ATTACHMENT B

Basic Maintenance School District ERATE Scope of Work IF APPLICABLE

The following describes the range of maintenance services to be provided by GigaKOM. The proposed services are contingent upon final approval by the District.

Basic maintenance services are "necessary" if, but for the maintenance at issue, the connection would not function and serve its intended purpose with the degree of reliability ordinarily provided in the marketplace to entities receiving such services without e-rate discounts.

Basic maintenance services do not include services that maintain equipment that is not supported or that enhance the utility of equipment beyond the transport of information, or diagnostic services in excess of those necessary to maintain the equipment's ability to transport information.

The primary purpose of the services for which support is sought must be the delivery of services to the classrooms or other places of instruction at schools and libraries that meet the statutory definition of an eligible institution. Support for the administrative functions of library or education programs is permitted so long as the services are part of the network of shared services for learning. Support will be limited to services delivered to the onsite educational facility or facilities.

GigaKOM will provide support for all services under this contract that will provide a minimum of switched 100BT network service and T-1 Internet Access to all eligible areas of the district. This includes unanticipated component replacement and expansion of the district's network.

All services must be performed in the ERATE funding window.

Duties will be limited to only those dealing with maintenance and operation of telecommunications and internal connections as specified in FCC Document *CC Docket No. 96—45 Schools and Libraries Eligibility List*. (Attachment C). Any work not covered on the eligibility list must be covered under a separate contract or invoice.

LIST OF ELIGIBLE COMPONENTS

This list is required by the Schools and Libraries Division to identify the scope of equipment and services that are covered by this contract. Additionally, the SLD wishes to determine that no ineligible components are included for maintenance. All components must be a part of a network of shared services for learning.

The items covered by this agreement are listed in the RFP, GigaKOM's proposal in response to the RFP and the quotation / pricing form provide
