

Committee to Consider High School Consolidation: Overview of Student Support Services

**October 30, 2018
Student Support Services, Educational Services**

Presentation Goals

- Provide brief overview of Student Support Services at the high schools
- Present student support data from each of the high schools
- Present current data on personnel in student support at the high schools
- Present student support staffing in other districts
- Present key findings from the Alameda Unified Mental Health Needs Assessment
- Present student survey data from each of the high schools
- Present questions that should be asked in considering the consolidation that data cannot address

Presentation Lenses

- Evaluate the current Alameda High School and Encinal Junior & Senior High School 9-12 student supports as well as the feasibility of a combined high school program
- Present an overview of the Alameda High School and Encinal Junior & Senior High School 9-12 student support programs to support a broader assessment of AUSD secondary program options including the equity of program offerings across the schools

Equity Defined (National Equity Project)

Educational equity means that each child receives what he or she needs to develop to his or her full academic and social potential.

Working towards equity involves:

- Ensuring equally high outcomes for all participants in our educational system; removing the predictability of success or failures that currently correlates with any social or cultural factor
- Interrupting inequitable practices, examining biases, and creating inclusive multicultural school environments for adults and children
- Discovering and cultivating the unique gifts, talents, and interests that every human possesses

Source: <http://nationalequityproject.org/about/equity>

Equity Considerations

In an analysis of our high school programs as well as exploration of potential consolidation/alternative structures, there are several key areas in which equity of resources, opportunity, and program should be considered. These include but are not limited to:

- Personnel resources
- Student support offerings
- Availability of resources
- Unique student support offerings

Comprehensive High School Program

The following supports are offered at BOTH Encinal Junior & Senior High School AND Alameda High School:

- Response to intervention period
- School based health center
- Intervention Lead to coordinate intervention, track data, deliver intervention, and lead the Coordination of Services Team meetings
- Academic counseling
- College and Career Centers

A Note on Demographic and Enrollment Data

- Demographic and enrollment data, unless otherwise noted, represents 2017-18 CBEDS (California Basic Educational Data System). This data is certified annually at the end of October.
- As 2018-19 data has yet to be certified, key indicators such as the percentages of students who are socioeconomically disadvantaged and finalized enrollment are not available.
- Use of 2017-18 data enables clearer alignment with student achievement results that are aligned to CBEDS enrollment data.

Mental Health Needs Assessment

The report consists of:

- An **Executive Summary**: summarizes key findings and key recommendations in the seven categories:
 - Three Tiers of Support
 - Coordinated Practices
 - School-wide Responsibility
 - District Capacity
 - Cultural Responsiveness
 - School-based Health Center
 - Other
 - Next Steps
- Key findings for each category listed above
- Recommendations for each category listed above
- A list of no-cost recommendations
- Budget needed to implement the recommendation to address the needs assessment
- References

Three Tiers of Support: Key Findings

- Students, parents, staff, and key stakeholders overwhelmingly reported that additional staff (counselors, therapists, psychologists, etc.) and behavioral health services, including individual, group, peer, and family counseling, are needed to address students' ever increasing behavioral health needs.
- There is a critical need to increase partnership with mental health providers and agencies that can support the district's efforts to implement a comprehensive behavioral health integrated system of support.
- While all schools and students are able to identify specific initiatives and programs that fit into each of the tiers, there is little agreement regarding which one all schools should be part of and which ones can be customized to meet an individual school's need.
- A large group of parents do not agree that consequences for not following school wide expectations are enforced fairly.

Three Tiers of Support: Key Findings (cont.)

- More than 40% of staff feels the school encourages teachers to have common procedures, hold class meetings to set goals and norms, plan activities, and identify and solve problems.
- Almost half the staff indicated confusion regarding what behaviors are handled by the teacher and what should be office managed.
- Parents, students, and staff believe more work needs to be done to building a strong sense of school community.
- Students, staff, and parents all reported that the biggest behavioral health problems for students in their schools are depression or feeling sad, anxiety, teasing, and problems at home that affect the student at school.
- Student groups overwhelmingly reported problems dealing with stress, anxiety, feeling sad or feeling hopeless, and suicidal thoughts.
- Students reported problems with drug use and abuse, especially cannabis, alcohol, and vaping.

Coordinated Practices: Key Findings

- Clarification of roles and responsibilities for all mental health related staff (e.g. Behavior specialist, Psychologist, Interns, Intervention Leads, and COST coordinators) is needed
- Systems of behavioral health support vary by site
- Clarification of the referral process is needed
- Clarification of the COST process is needed along with expectations for all sites
- The resources to meet the needs of students are woefully inadequate and at a crisis level
- Improved coordination with outside agencies is needed so it is not fragmented and is more efficient
- Consistent curriculum and programs are needed across the district and within schools for social-emotional needs
- Improved collaboration and coordination among partners is needed to share best practices and to include non-clinical partners, such as teachers

School Wide Responsibility: Key Findings

- Training of staff, parents, and key partners in identifying and referring students is needed
- Improved, targeted communication with parents, including in languages other than English, is needed
- Internal communications need improvement to better coordinate services
- The role of outside providers needs clarification to ensure alignment with district efforts and staff roles to eliminate duplication of efforts and streamline access to services
- More training is needed for all staff as it relates to addressing and managing the needs of students with specific disorders (those with ADHD, depression, autism, etc.)
- Families are facing significant issues and are hesitant to seek help/support through the school due to a variety of barriers (e.g., privacy concerns, stigma, lack of money or time to address the issues, and don't know what services are available)
- Greater awareness for staff related to the struggles students and families are dealing with; increasing empathy and problem solving approaches is needed
- Building staff/adult capacity to support students' behavioral health needs continues to be a need (recognizing the signs, trauma-informed practices, equity, inclusion, etc.)

District Capacity: Key Findings

- MTSS, PBIS, COST, the referral process for crisis support, provider roles, threat assessments, and risk assessments continue to need further development, which is a district leadership responsibility
- More training for Tier 1 strategies and clarity of expectations of all staff to implement the Tier 1 strategies are needed
- Some sites feel that PBIS and MTSS are strong and others do not feel that way
- Coordination and implementation of PBIS at this point are inconsistent across school sites with some saying it is "poor, especially at the larger schools"
- Frustration was expressed with not having a unified vision and clarity of expectations for behavioral health across the district to help create a more cohesive and equitable system of support
- The exact role of district staff and specialists is not clear across all sites
- Clear expectations for outside providers are needed
- District-wide protocols for behavioral health crises do not exist

Cultural Responsiveness: Key Findings

- More discussion among staff regarding cultural sensitivity and inclusion is needed
- Some classes feel welcoming to students and families and others do not
- There is a disparity regarding suspension rates in many schools, especially as it relates to African American students (low percent of enrollment, higher percent of students suspended) and special needs students
- For many it feels that teachers/adults don't really understand what students are going through and thus supports feel inadequate
- For some it feels that teachers and adults don't understand certain cultural/ethnic backgrounds, including those with lower socio-economic backgrounds
- Some teachers are more compassionate and caring; others are less so
- Some students/schools report there is not an issue with racism and others report there are issues with racism on the campus
- Some students feel that there are a lot of assumptions made about their culture which are not accurate
- Students, staff, and families feel that there is a need for a more diverse staff
- The curriculum needs to be more culturally responsive

Access to School-based Health Center: Key Findings

- The goal to maximize use of the health center by students has not yet been met
- Communication, coordination, and integration between the SBHC and the high schools are in need of improvement
- Referrals to the health centers are one of the least referrals made
- Many students are aware of the health center and many indicated they did not know about it
- Many staff indicated that they did not know about the health center
- Those who know about the health center were able to name some of the services that are provided there
- The students and parents listed many barriers to accessing the health center (i.e., trust, embarrassment, lack of connection to staff, not knowing where it is, and not knowing the full scope of services)
- There is a waitlist at the Health Center to service students in need

Alameda and Encinal Mental Health Survey Summary

Bullying

- At AHS 48.8% of students surveyed feel a lot or some students are affected by bullying
- At Encinal 44.5% of students surveyed feel a lot or some students are affected by bullying

Drugs and Alcohol

- At AHS 86.8% of students surveyed feel a lot or some students are affected by drug and alcohol use
- At Encinal 62.1% of students surveyed feel a lot or some students are affected by drug and alcohol use

Depression

- At AHS 87.1% of students surveyed feel a lot or some students are affected by feelings of depression
- At Encinal 64.4% of students surveyed feel a lot or some students are affected by feelings of depression

Alameda and Encinal Mental Health Survey Summary

Feeling Disconnected from Staff and Students at School

- At AHS 71.1% of students surveyed feel a lot or some students are affected by feeling disconnected to school
- At Encinal 49.9% of students surveyed feel a lot or some students are affected by feeling disconnected to school

Connection to an Adult on Campus

- At AHS 39.4.8% of students surveyed strongly agree or agree that there was an adult on campus they could go to for extra support
- At Encinal 56% of students surveyed strongly agree or agree that there was an adult on campus they could go to for extra support

Teachers Show Respect and Care

- At AHS 66.2% of students surveyed strongly agree or agree that teachers show respect and caring for students
- At Encinal 67.5% of students surveyed strongly agree or agree that teachers show respect and caring for students

Alameda and Encinal Mental Health Survey Summary

Feeling Worried, Anxious, or Stressed

- At AHS 92.8% of students surveyed feel a lot or some students are affected by feeling worried, anxious, or stressed
- At Encinal 71.6% of students surveyed feel a lot or some students are affected by feeling worried, anxious, or stressed

Feeling Unsafe due to Violence, Fights, or Threats

- At AHS 37.2% of students surveyed feel a lot or some students are affected by feeling unsafe due to violence, fights, or threats
- At Encinal 29% of students surveyed feel a lot or some students are affected by feeling unsafe due to violence, fights, or threats

Questions to Consider

- The data from the mental health needs assessment student survey shows that Alameda High School has some significant gaps in school connectedness. Will increasing the number of students on one campus intensify these issues?
- Will there be enough break-out spaces for over 3,000 students to accommodate the growing need for small group intervention?
- Where will staff meetings and professional development take place for a staff of 160 people?
- Currently passing period for Encinal is five minutes, Alameda High is seven minutes and with an increase in student population the passing period time will probably have to increase to 10 minutes due to crowding. Will this take away from instructional minutes?

Questions to Consider

- Encinal's chronic absenteeism rate is higher than Alameda High's. How will making students attend school further from their homes affect the absenteeism rate?
- Encinal's socioeconomically disadvantaged student population is higher than Alameda High School. How will this affect transportation to school?
- More students at AHS report that students feel unsafe, stressed, and are struggling with depression at a much higher rate than Encinal. How will consolidating schools increase or decrease these feelings?
- Knowing the key findings from the mental health needs assessment, how will consolidating the two high schools address the needs of our students?
- In districts that have two high schools, what do they do differently?
 - Example: San Lorenzo – no boundaries, open enrollment into specialized programs at each school

Considerations

- Significant gaps in student performance exist across socioeconomic, race/ethnicity, ability, and language fluency lines. This is the case at both AHS and EHS. In any scenario - consolidated, reconfigured, or unchanged - eliminating the predictability of student outcomes along demographic lines remains the core work at each site and across the district.
- If truly considering school consolidation, a team of students, staff, and community members should visit large high schools to ask both qualitative and quantitative questions to get a better idea of the plausibility of one comprehensive high school in Alameda.

Opportunities, Challenges, and Considerations

The preceding slides present current challenges, potential opportunities (in either a combined or non-combined program scenario), and additional considerations for the high school program(s).

NB: Staff strongly support the forthcoming 2019 strategic planning process including the community development of a renewed 'graduate profile.' Many of the opportunities, challenges, and considerations presented in the following section would be best reviewed/acted upon following such a process so that a broad range of stakeholders could be engaged.
